Retaining Wall-SeaTac - Seattle, WA

ConRAC-San Jose Airport - San Jose, CA

Aviation Overview

Kleinfelder has provided engineering services to airport facilities for almost half a century. We have worked on more than 1,000 airport projects involving terminals, hangers, parking structures, roadways, pavements, runways, taxiways, aprons, sound/noise walls, and fueling facilities—supported by our vast resources, deep technical expertise, and wide array of capabilities.

Industry Knowledge and Expertise

Our team of talented architects, engineers, and scientists work closely together with all stakeholders to solve complex challenges associated with aviation projects of various scope and size. We take great pride in our past performance on both federal and private aviation-related contracts, and in our ability to deliver contracted work on time and within budget.

Trusted Partner

We are known for our technical excellence and ability to carefully balance the range of architecture, engineering, and science services with construction costs, client requirements, and standards of practice. Our capabilities enable us to take both air and land-side projects from planning through construction, positioning us as an industry leader that can offer our clients peace of mind knowing their expectations, goals, and needs will be met.
