Industrial Overview

Today's industrial facilities are faced with a growing list of challenges in keeping their operations productive and profitable. From the preparation of environmental documentation for new or expanding facilities, to compliance with increasingly stringent energy, water, and sustainability regulations and policies, our clients are faced with pressures to reduce costs, improve efficiency, and produce more with less. For more than 50 years, Kleinfelder has been assisting industrial clients address these challenges through all phases of their business cycle. Our success within the Agricultural Products, Chemical and Pharmaceuticals, Manufacturing, Mining, and Aggregates markets is a reflection of our ability to help our clients overcome these challenges while achieving their business goals.

Partnering for Success

Kleinfelder believes that the most efficient way to serve our clients is to be a partner, assisting in the identification and implementation of total lifecycle solutions that consider not only the short-term objectives but also long-term business goals. Our professionals strive to understand our clients' business drivers and goals to identify the right solution.

Leveraging Technology

Leading edge technology is a key component of efficient project execution. From automated field data collection tools to three-dimensional smart design, Kleinfelder leverages technology to improve project efficiency, reduce costs, and provide meaningful deliverables.

Capabilities

- Air Quality & Greenhouse Gas Planning & Permitting
- Architecture
- Asset & Risk Management
