Ports & Harbors Overview
Kleinfelder has provided engineering, scientific, and architecture services to port and harbor facilities for almost half a century. We have worked on hundreds of port and harbor projects involving terminals, bridges, channel deepening, administration and maintenance facilities, roadways, heavy pavements, utilities, docking and fendering systems, and recreational buffer zones to neighboring communities.

Addressing Complex Challenges
Our talented problem solvers include civil, structural, electrical, geotechnical, materials, and environmental engineers, as well as scientists, geologists, architects, hydrologists, numerical modelers, marine biologists, and myriad other professionals. We take great pride in our past performance on both agency and private port and harbor projects, and in our ability to deliver contracted work on time and within budget.

Proven Expertise and Excellence
We are known for our technical excellence and ability to carefully balance field observations, laboratory testing, and engineering analyses with construction costs, client requirements, and standards of practice. Our capabilities enable us to take both marine and landside projects from planning through construction, positioning us as an industry leader that can offer our clients the peace of mind knowing their expectations, goals, and needs will be met.

Capabilities
- Early Stage Project Development
  - Desktop Constraints Analysis
  - Natural Resource Surveys
  - Preliminary Geotechnical Engineering
  - Environmental Permitting Requirements
- Design & Engineering
  - Architectural
  - Civil
  - Structural
  - Electrical
  - Geotechnical & Construction Materials
  - Project Management
- Permitting
  - NEPA/CEQA
  - Environmental - NOAA, NPS, USFWS, EPA, ACOE
  - Habitat Restoration & Mitigation
  - Dredging Activities
- Construction
  - QA & Engineering Services.
  - Environmental Monitoring
  - Construction Management/Project Management
- Operations & Maintenance
  - Asset Management
  - Regulatory Compliance
  - Sustainability
