

Construction Management and Inspection

Kleinfelder's construction management, inspection, and administration team provides clients with the tools they need to keep their projects on track. Our experienced staff provides full scope construction management and inspection services for all types of projects. From design development through project closeout, we are there as a part of an integrated team, providing cost-effective and functional solutions. Our primary goal is to understand the project's objectives, to represent the interest of the owner throughout the project, and to manage the achievement of the project's schedule, quality, and budgetary goals while maintaining the highest possible quality.

Our construction management services include:

- Construction Management
- Program Management
- Project Management
- Construction Inspection
- Staff Augmentation
- Office Engineering
- Contract Administration
- Utility Coordination
- Claims Resolution
- CPM Scheduling/Review
- Value Engineering
- Constructability Review
- Cost Estimating
- Community Relations
- Web Design
- Database Development

TYPE OF CLIENTS

Kleinfelder's construction management team provides services for a variety of clients for transportation, water/wastewater, building structure, and municipal projects. Kleinfelder's members are proud of the relationships we have built with our clients throughout the years; we consider ourselves experts at managing large-dollar on-call or as-needed contracts. We carefully plan and tailor the scope for each management assignment specifically for our clients and their project needs.

ABILITY TO DELIVER

Identifying and obtaining the necessary permits is a critical factor in the success of any project. It requires effective communication and planning with the affected municipalities, state and federal agencies, and other stakeholders. Kleinfelder's long-term working relationships with numerous local, state, and federal regulators kept us abreast of continually-changing statutes and the people in charge of enforcement—a significant advantage in the permitting process.
